## What is Odor-Bloc® Equine Stall Odor Eliminator?

**Odor-Bloc® Equine Stall Odor Eliminator** is an all natural environmentally safe additive that has been shown through extensive research to eliminate unpleasant odors including ammonia, sulfides and phenols.

**Odor-Bloc® Equine Stall Odor Eliminator** combines the odor fighting power of Odor-Bloc® with all natural absorbents to eliminate offensive odors.

**Natural Absorbents** – Trap moisture and lock in urine ammonia with a unique clumping action for easy moisture removal.

**Odor-Bloc®** – Reduces formation of ammonia and other noxious gases to control odor at its source.

The ingredients in **Odor-Bloc® Equine Stall Odor Eliminator** are natural and completely safe for the environment. After use, this product can be spread on fields,

gardens or garden composts to provide slow release nitrogen or handled however spent bedding is normally disposed.

**Odor-Bloc® Equine Stall Odor Eliminator** does not contain any added aromas or fragrances. Although some products simply try to cover up or mask odors with fragrances or scents, this does not solve the problem. In addition, market surveys have shown that many added fragrances are irritating to both horses and their owners.

## Why use Odor-Bloc® Equine Stall Odor Eliminator?

High concentrations of ammonia and other odor causing gases can increase the risk of serious health problems for horses and farm workers. These include eye irritation, respiratory disease, foal pneumonia and confinement cough. Elimination of odor causing gases reduces this risk and helps to ensure the quality of life for both you and your horses.

## How is Odor-Bloc® Equine Stall Odor Eliminator used?

**Odor-Bloc® Equine Stall Odor Eliminator** is a granular product that is sprinkled on top of normal stall bedding. These granules quickly penetrate through the bedding to provide an odor protective blanket throughout the stall. **Odor-Bloc®** continues to be effective, even when wet.

## How does Odor-Bloc® Equine Stall Odor Eliminator compare to other products?

**Odor-Bloc® Equine Stall Odor Eliminator** is more effective than other products because it eliminates odors instead of just masking them. Unlike some products, **Odor-Bloc®** will not cause drying and cracking of hooves and is not toxic or hazardous to the environment. In addition, on a per head per day basis **Odor-Bloc®** costs less.
